Reduction permitted by section 167(f)	300	
		200
Amount to be depreciated over the useful life		2,800

D's depreciation allowance on the station wagon for the year 1963 would be $700 ($2,800 divided by 4, the remaining useful life).

[T.D. 6712, 29 FR 3654, Mar. 24, 1964, as amended by T.D. 6838, 30 FR 9064, July 20, 1965]

§ 1.167(g)–1 Basis for depreciation.

The basis upon which the allowance for depreciation is to be computed with respect to any property shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. In the case of property which has not been used in the trade or business or held for the production of income and which is thereafter converted to such use, the fair market value on the date of such conversion, if less than the adjusted basis of the property at that time, is the basis for computing depreciation.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(h)–1 Life tenants and beneficiaries of trusts and estates.

(a) *Life tenants.* In the case of property held by one person for life with remainder to another person, the deduction for depreciation shall be computed as if the life tenant were the absolute owner of the property so that he will be entitled to the deduction during his life, and thereafter the deduction, if any, shall be allowed to the remainderman.

(b) *Trusts.* If property is held in trust, the allowable deduction is to be apportioned between the income beneficiaries and the trustee on the basis of the trust income allocable to each, unless the governing instrument (or local law) requires or permits the trustee to maintain a reserve for depreciation in any amount. In the latter case, the deduction is first allocated to the trustee to the extent that income is set aside for a depreciation reserve, and any part of the deduction in excess of the income set aside for the reserve shall be apportioned between the income beneficiaries and the trustee on the basis of the trust income (in excess of the income set aside for the reserve) allocable to each. For example:

(1) If under the trust instrument or local law the income of a trust computed without regard to depreciation is to be distributed to a named beneficiary, the beneficiary is entitled to the deduction to the exclusion of the trustee.

(2) If under the trust instrument or local law the income of a trust is to be distributed to a named beneficiary, but the trustee is directed to maintain a reserve for depreciation in any amount, the deduction is allowed to the trustee (except to the extent that income set aside for the reserve is less than the allowable deduction). The same result would follow if the trustee sets aside income for a depreciation reserve pursuant to discretionary authority to do so in the governing instrument.

No effect shall be given to any allocation of the depreciation deduction which gives any beneficiary or the trustee a share of such deduction greater than his pro rata share of the trust income, irrespective of any provisions in the trust instrument except as otherwise provided in this paragraph when the trust instrument or local law requires or permits the trustee to maintain a reserve for depreciation.

(c) *Estates.* In the case of an estate the allowable deduction shall be apportioned between the estate and the heirs legatees, and devisees on the basis of income of the estate which is allocable to each.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(i)–1 Depreciation of improvements in the case of mines, etc.

Property used in the trade or business or held for the production of income which is subject to the allowance for depreciation provided in section 611 shall be treated for all purposes of the Code as if it were property subject to the allowance for depreciation under section 167. The preceding sentence shall not limit the allowance for depreciation otherwise allowable under section 611.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(l)–1 Limitations on reasonable allowance in case of property of certain public utilities.

(a) *In general*—(1) *Scope*. Section 167(l) in general provides limitations on the use of certain methods of computing a reasonable allowance for depreciation under section 167(a) with respect to ''public utility property'' (see paragraph (b) of this section) for all taxable years for which a Federal income tax return was not filed before August 1, 1969. The limitations are set forth in paragraph (c) of this section for ''pre-1970 public utility property'' and in paragraph (d) of this section for ''post-1969 public utility property.'' Under section 167(l), a taxpayer may always use a straight line method (or other ''subsection (l) method'' as defined in paragraph (f) of this section). In general, the use of a method of depreciation other than a subsection (l) method is not prohibited by section 167(l) for any taxpayer if the taxpayer uses a ''normalization method of regulated accounting'' (described in paragraph (h) of this section). In certain cases, the use of a method of depreciation other than a subsection (l) method is not prohibited by section 167(l) if the taxpayer used a ''flow-through method of regulated accounting'' described in paragraph (i) of this section) for its ''July 1969 regulated accounting period'' (described in paragraph (g) of this section) whether or not the taxpayer uses either a normalization or a flow-through method of regulated accounting after its July 1969 regulated accounting period. However, in no event may a method of depreciation other than a subsection (l) method be used in the case of pre-1970 public utility property unless such method of depreciation is the ''applicable 1968 method'' (within the meaning of paragraph (e) of this section). The normalization requirements of section 167(l) with respect to public utilityproperty defined in section 167(l)(3)(A) pertain only to the deferral of Federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. Regulations under section 167(l) do not pertain to other book-tax timing differences with respect to State income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items. The rules provided in paragraph (h)(6) of this section are to insure that the same time period is used to determine the deferred tax reserve amount resulting from the use of an accelerated method of depreciation for cost of service purposes and the reserve amount that may be excluded from the rate base or included in no-cost capital in determining such cost of services. The formula provided in paragraph (h)(6)(ii) of this section is to be used in conjunction with the method of accounting for the reserve for deferred taxes (otherwise proper under paragraph (h)(2) of this section) in accordance with the accounting requirements prescribed or approved, if applicable, by the regulatory body having jurisdiction over the taxpayer's regulated books of account. The formula provides a method to determine the period of time during which the taxpayer will be treated as having received amounts credited or charged to the reserve account so that the disallowance of earnings with respect to such amounts through rate base exclusion or treatment as no-cost capital will take into account the factor of time for which such amounts are held by the taxpayer. The formula serves to limit the amount of such disallowance.

(2) *Methods of depreciation*. For purposes of section 167(l), in the case of a declining balance method each different uniform rate applied to the unrecovered cost or other basis of the property is a different method of depreciation. For purposes of section 167(l), a change in a uniform rate of depreciation due to a change in the useful life of the property or a change in the taxpayer's unrecovered cost or other basis for the property is not a change in the method of depreciation. The use of
